

We have chosen to protect your data using the gold standard in data protection platforms for firms worldwide.

Secure. Compliant. In Control.

We value the trust you put in us as custodians of your data, and we take steps to ensure that all our apps and data are secure. It's vital for us that we have enterprise-grade security.

This is why we've partnered with Practice Protect, the world's #1 data security platform for accounting firms. See below for the core Practice Protect features that help us protect your data.

Password Encryption

Passwords are encrypted with 2048-bit encryption in Practice Protect. The applications we use in our firm are protected with Practice Protect's powerful encryption.

Email Protection

Email is the vehicle for plenty of cyber attacks and scam attempts. With Practice Protect's email integration, we ensure that our email systems are under the same security parameters as our apps and passwords are.

Remote Team Security

Our employees who work from home or work remotely are also on the Practice Protect platform, ensuring data security for not just in-office team members, but also for remote ones.

Learn more about Practice Protect and the full suite of features we use to secure your data here.
